

Best in Preparing Your Child For The Exams And For Life

ENRICHING YOUR CHILD'S LEARNING EXPERIENCE

THE LEARNING LAB BELIEVES IN EMPOWERING YOUR CHILD WITH THE RIGHT KNOWLEDGE, SKILLS, AND DISPOSITIONS THAT WILL HELP HIM OR HER ACHIEVE SUCCESS IN SCHOOL AND IN LIFE.

For over 16 years, The Learning Lab has been the leading provider of tuition and enrichment services. Here, your child's learning needs form the basis of curriculum development, lesson planning, and teacher training. This means that your child is given the right academic support in the form of a safe environment, relevant and engaging lesson materials, and teachers who see the best in them.

Your child will learn how to identify, set, and work towards achievable academic and personal goals. They will be guided on monitoring these goals and acquiring the key skills to help achieve them. Teachers at The Learning Lab guide your child to think about the process behind each question they analyse and each answer they pen. This helps your child think and learn deeply.

The Learning Lab's curriculum is designed with your child in mind — they curate engaging learning experiences through lesson materials that are researched and written through a meticulous editing process to ensure accuracy. Lesson materials are updated weekly, making them rich and relevant resources for students to hone key subject-specific skills. Additionally, The Learning Lab's materials cover the MOE syllabus.

The Learning Lab helps your child become a confident learner so as to empower them with strong

analytical and problem-solving abilities. This means that your child has the skills to integrate what they learn in class to their day-to-day experiences.

The Learning Lab's teachers mentor, advise, and guide your child to achieve his best. As they adapt their lesson plans and teaching styles to fit the learning needs of your child, learning becomes more engaging, relevant, and fun.

In The Learning Lab classroom, teachers facilitate discussions and help your child build on and refine their existing knowledge. They encourage your child to express their views confidently and to continually seek progress in each task they attempt.

Registration For Term 1-2018 Classes Is Now Open

Contact The Learning Lab to find out more about their 2018 programmes. Classes are filling fast.
